

# TABLE OF CONTENTS

**December 7, 2020**

## Cycle analysis (1)

Chair: Piotr Domanski (National Institute of Standards and Technology)

ID	Paper and authors
1083	Experimental evaluation of natural refrigerant blends as substitutes for R-600a in a domestic fridge and freezer Daniel Calleja-Anta, Daniel Sanchez, Ramon Cabello, Laura Nebot-Andres, Rodrigo Llopis (Thermal Engineering Group, Mechanical Engineering and Construction Department, Jaume I University)
1062	Dynamic Simulation of Frost Accumulation in Propane Air Source Heat Pumps Jiazhen Ling, Vikrant C Aute (University of Maryland)
1110	Energy flow analysis of a poultry processing plant Eirik Starheim Svendsen (SINTEF Ocean), Armin Hafner, Haakon Selvnes (NTNU), Kristina Norne Widell (SINTEF Ocean)
1023	Exergy analysis of combined absorption-compression heat pump with ammonia-water mixture as working fluid Marcel Ulrich Ahrens, Ivar Stale Ertesvag, Trygve Magne Eikevik (NTNU)

## Components and processes (1)

Chair: Ji Hwan Jeong (Pusan National University)

ID	Paper and authors
1019	Experimental evaluation of a water based high temperature heat pump with novel high pressure lift turbo compressors Espen Halvorsen Verpe, Christian Schlemminger, Michael Bantle (SINTEF Energy Research), Marcel Ulrich Ahrens (NTNU)
1044	DEVELOPMENT OF HERMETIC LARGE-CAPACITY SWING COMPRESSOR USING CO <sub>2</sub> Yousuke Ohnishi, Hiroyuki Taniwa, Mikio Kajiwara, Youhei Nishide, Naoto Tomioka, Masaaki Adachi, Daisuke Okamoto, Hitoshi Ueda (DAIKIN INDUSTRIES,LTD)
1100	Performance analysis of a scroll compressor working with propane for heat recovery applications Javier Marchante-Avellaneda, Alejandro Lopez-Navarro, Emilio Navarro-Peris, Jose Miguel Corberan (Universitat Politècnica de València)
1130	Experimental heat exchanger test facility for evaporation and condensation of hydrocarbons Stian Traedal, Geir Skaugen, Monika Nikolaisen, Jacob Stang (SINTEF Energy Research)
1131	Optimization of R290 heat exchangers utilizing high performance, non-round tubes James Tancabel, Vikrant Aute, Jiazhen Ling (University of Maryland)

## Systems (1)

Chairs: Akio Miyara (Saga University)Ryo Akasaka (Kyushu Sangyo University)

ID	Paper and authors
1199	Basic Performance of CO <sub>2</sub> Cyclone Refrigeration System Hiroyuki Wakimoto, Koshiro Uchi (Doshisha University), Haruhiko Yamasaki (Osaka Prefecture University), Hiroshi Yamaguchi (Doshisha University), Takashi Kamimura, Kazuhiro Hattori (Mayekawa mfg. co., LTD), Petter Neksa (NTNU)
1183	Numerical Investigation of CO <sub>2</sub> Heat Pump Water Heater Performance Yulianto Muhamad (Research Institute For Engineering and Science Waseda University), Suzuki Takaoki, Miyaoka Yoichi, Ohno Keisuke (Department of Applied Mechanics and Aerospace, Waseda University), Giannetti Niccolo (Waseda Institute for Advance Study, Waseda University), Saito Kiyoshi, Yamaguchi Seiichi (Department of Applied Mechanics and Aerospace, Waseda University)

<b>1160</b>	Experimental and numerical investigation of a transcritical CO <sub>2</sub> air/water reversible heat pump: analysis of domestic hot water production Giacomo Tosato, Paolo Artuso, Silvia Minetto, Antonio Rossetti (Construction Technologies Institute- National Research Council), Yosr Allouche (Department of Energy and Process Engineering, Norwegian University of Science and Technology), Krzysztof Banasiak (SINTEF Energy Research)
<b>1214</b>	Development of Commercial Condensing Unit Employing CO <sub>2</sub> as Natural Refrigerant Kosei Nishimura, Kenichi Murakami, Takahide Goto (Mitsubishi Heavy Industries Thermal Systems, Ltd.)
<b>1045</b>	Experimental evaluation of CO <sub>2</sub> refrigeration plant with integrated mechanical subcooling system at optimal working conditions Laura Nebot-Andres, Daniel Sanchez, Ramon Cabello, Daniel Calleja-Anta, Rodrigo Llopis (Thermal Engineering Group, University Jaume I)

## Sorption (1)

Chair: Alberto Coronas (Universitat Rovira i Virgili)

<b>ID</b>	<b>Paper and authors</b>
<b>1034</b>	PARTIAL HYBRID COMPRESSION HEAT TRANSFORMER HEAT PUMP Mihail-Dan N Staicovici (SC Varia Energia SRL)
<b>1035</b>	FURTHER RESEARCH IN COABSORBENT TECHNOLOGY: THE COOLING AND HEATING COGENERATION TRUNCATED CYCLES Mihail-Dan N Staicovici (SC Varia Energia SRL)
<b>1176</b>	Assessment of surfactant-induced Marangoni convection within high-temperature aqueous Lithium-Bromide solution Niccolo Giannetti (Waseda Institute for Advanced Study), Luca Rametta (University of Florence, Department of Industrial Engineering), Ryota Fukui, Masayoshi Hirasawa, Noriyuki Nishiyama, Seiichi Yamaguchi, Kiyoshi Saito (Waseda University, Department of Applied Mechanics and Aerospace Engineering)
<b>1145</b>	Experimentally verified dynamic simulation model of a NH <sub>3</sub> /H <sub>2</sub> O-absorption refrigeration system Michael Wernhart, Rene Rieberer (Graz University of Technology), Sandra Zlabinger, Viktor Unterberger, Markus Goelles (BEST Bioenergy and Sustainable Technologies GmbH)
<b>1217</b>	Experimental evaluation on sub-zero performance of an exhaust-heat-driven absorption refrigeration system using NH <sub>3</sub> /LiNO <sub>3</sub> as working pair Sai Zhou, Xiao Liang, Guogeng He, Dehua Cai (Huazhong University of Science and Technology)

## Cycle analysis (2)

Chair: Andy Pearson (Star Refrigeration)

<b>ID</b>	<b>Paper and authors</b>
<b>1213</b>	Development of an Improved Transcritical Refrigeration System using Natural Refrigerants for Low-temperature Applications Mojtaba Purjam, Kyaw Thu, Takahiko Miyazaki (Kyushu University)
<b>1018</b>	Theoretical analysis and comparison of different heat pump cycles using water as working fluid Di Wu, Bin Hu (Shanghai Jiao Tong University), Junyu Liang (Yunnan Power Grid Co. , Ltd), R.Z. Wang (Shanghai Jiao Tong University)
<b>1179</b>	Thermodynamic investigation of asynchronous open inverse air cycle integrated with compressed air energy storage Adriano Milazzo (University of Florence, Department of Industrial Engineering), Niccolo Giannetti (Waseda Institute for Advanced Study, Waseda University), Seiichi Yamaguchi, Kiyoshi Saito (Waseda University, Department of Applied Mechanics and Aerospace Engineering)
<b>1187</b>	Heat Recovery Ventilation Heat Pump Water Heaters: Status of the Art and Transition to Propane Rossana Boccia, Valentin Salgado Fuentes, Jonas Kjaer Jensen, Wiebke Brix Markussen (Technical University of Denmark)

## Components and processes (2)

Chair: Davide del Col (University of Padova)

ID	Paper and authors
1193	Effect of the High Porosity Sintered Fiber on the Surface in Subcooled Boiling Heat Transfer Enhancement Edgar Santiago Galicia, Kosuke Kumatori, Yusuke Otomo, Koji Enoki (The University of Electro-Communications)
1075	CO <sub>2</sub> Gas Coolers Circuitry Optimization Accounting for Fin Conduction Zhenning Li (Oak Ridge National Laboratory), Vikrant Aute (University of Maryland)
1120	Testing of tri-partite CO <sub>2</sub> gas cooler prototype for domestic hot water and space heating Ignat Tolstorebrov, Alireza Zendeheboudi (NTNU), Krzysztof Banasiak (SINTEF Energy Research), Lukas Koster (Karlsruhe University of Applied Sciences), Angel Alvarez Pardinias, Armin Hafner (NTNU)
1094	Evaluation of a pillow-plate heat exchanger for a pump-circulated CO <sub>2</sub> refrigeration system Hakon Selvnes (Norwegian University of Science and Technology), Vera Buttner (Karlsruhe University of Applied Sciences), Armin Hafner (Norwegian University of Science and Technology)

## Systems (2)

Chair: Björn Palm (KTH Royal Institute of Technology)

ID	Paper and authors
1026	Improvements in the Prediction of Energy Performance of Refrigeration Systems Andy Pearson (Star Refrigeration Ltd)
1119	APPLYING COOLENERG WORKING PROCESS THE HYBRID COMPRESSION REFRIGERATION AND EFFICIENT OXYGEN PRODUCTION FOR FEASIBILITY INCREASE IN ZERO CO <sub>2</sub> EMISSION POWER GENERATION Mihail-Dan N Staicovici (SC Varia Energia SRL)
1068	An open-source Modelica library for design and control: Modular and scalable heat pump models using natural refrigerants Christian Vering, Mirko Engelpracht, Markus Nuerenberg, Dirk Mueller (RWTH Aachen University)
1067	Pareto-Optimal System Structure and Process Design Including Natural Refrigerants for Heat Pump Systems Christian Vering, Jonas Klingebiel, Christoph Hoeges, Markus Nuerenberg, Dirk Mueller (RWTH Aachen University)

## Sorption (2)

Chair: Niccolo Giannetti (Waseda University)

ID	Paper and authors
1111	Small-scale solar-based adsorption ice maker for Indian climate Erling Vingelsgaard, Ignat Tolstorebrov (NTNU), Kristina N. Widell (SINTEF Ocean AS), Sourav Mitra, Maddali Ramgopal (Indian Institute of Technology Kharagpur), Trygve M. Eikevik (NTNU)
1192	CFD analysis for the enhancement of adsorbing moisture by oscillating flow Atsushi Akisawa, Syu Sato, Akane Uemichi (Tokyo University of A&T)
1210	Pore Size Distribution and Connectivity Determination by Pore Network Modelling Lili Yu, Wei-Lun Hsu, Hirofumi Daiguji (The University of Tokyo)
1209	Grand Canonical Monte Carlo (GCMC) Simulations of Water Adsorption in MIL-101(Cr) Metal-Organic Frameworks Shubo Fei, Wei-Lun Hsu, Hirofumi Daiguji (The University of Tokyo)

## December 8, 2020

### Properties

Chair: Ryo Akasaka (Kyushu Sangyo University)

ID	Paper and authors
1105	Experimental study of isobutane (R600a) evaporation in microfinned and smooth tubes Ehsan Allymehr, Marie Roux, Angel Alvarez Pardinias, Trygve Magne Eikevik, Armin Hafner (NTNU)
1059	Water boiling at low pressure: dynamics of growth and bursting of bubbles in a plate-type evaporator Patric Mantaropoulos, Florine Giraud, Brice Tremeac, Pascal Tobaly (Laboratoire du Froid, des Systemes Energetiques et Thermiques (Lafset), Cnam, HESAM University)
1198	Thermal Characteristics in Supercritical CO <sub>2</sub> Along Heating Tube Takuya Tazawa, Seiya Yoshida (Doshisha University), Haruhiko Yamasaki (Osaka Prefecture University), Hiroyuki Wakimoto, Hiroshi Yamaguchi (Doshisha University), Takeshi Kamimura, Kazuhiro Hattori (Mayekawa mfg. co., LTD), Petter Neksa (NTNU)
1015	Numerical simulation of ice slurry patterns with phase interactions effects inside different channels structures of plate heat exchangers Shaimaa Hefny, Christiane Thomas, Ullrich Hesse (TU Dresden)
1221	Correlation of R290 + Ethanol using Cubic Equation of State with some Mixing Rules Tomoya Tsuji (Universiti Teknologi Malaysia), Misaki Nakazawa (Nihon University), Andrea Jia Xin Lai, Lian See Tan (Universiti Teknologi Malaysia), Taka-aki Hoshina (Nihon University), Atsumasa Yoshida (Osaka Prefecture University)

### Components and processes (3)

Chairs: Akio Miyara (Saga University) Norihiro Inoue (Tokyo University of Marine Science and Technology)

ID	Paper and authors
1132	The effect of tube diameters on evaporation heat transfer for ammonia falling liquid-film Ikuro Akada, Kenichi Obata, Masashi Kato, Kosaku Nishida (R and D Center, MAYEKAWA MFG. CO., LTD.), Norihiro Inoue (Tokyo University of Marine Science and Technology)
1152	Numerical analysis of flow maldistribution in large-scale liquid overfed finned-tube ammonia evaporators Martin Ryhl Kaern, Wiebke Brix Markussen (Technical University of Denmark), Johannes Krisofersson (Danish Technological Institute)
1197	Two-phase Flow Boiling Heat Transfer Correlation of Natural Refrigerants in Minichannels Chien Ba Nguyen (Hanoi University of Science and Technology), Vu Quang Pham (Electric Power University), Jong-Taek Oh (Chonnam National University)
1207	Experimental Investigation on a Loop Heat Pipe Using Different Working Wick Materials Kyaw Zin Htoo (Saga University), Phuoc Hien Huynh (Ho Chi Minh City University of Technology), Keishi Kariya (Saga University), Akio Miyara (Kyushu University)

### Systems (3)

Chair: Reinhard Radermacher (University of Maryland)

ID	Paper and authors
1139	Heat pump/chiller system for centralized kitchens in India Simarpreet Singh (ECO REFTEC Pvt. Ltd.), Armin Hafner, Krzysztof Banasiak (Norwegian University of Science and Technology), Satyanarayanan Seshadri, Prakash M Maiya (Indian Institute of Technology Madras), Silje Smitt (Norwegian University of Science and Technology), Cecilia H. Gabrielli (SINTEF Energy Research)
1066	ANALYSIS OF SEVERAL SOLAR THERMAL ELECTRICAL CYCLES BOOSTED BY ABSORPTION WORKING TECHNOLOGY AND OPERATED IN A DESERT CLIMATE Mihail-Dan N Staicovici (SC Varia Energia SRL)
1010	Natural refrigerants in heat pump system Bin Hu, Di Wu (Shanghai Jiao Tong University), Junyu Liang (Yunnan Power Grid Co. , Ltd.), R.Z. Wang (Shanghai Jiao Tong University)
1121	Integration of heat pumps with natural working fluids into a neighborhood energy system Inthujan Rasalingham (NTNU), Daniel Rohde (SINTEF Energy Research AS), Ignat Tolstorebrov, Trygve M. Eikevik (NTNU)

<b>1107</b>	Feasibility study of various conventional and unconventional natural refrigerants for high temperature heat pump applications Joshua Young, Alison Subiantoro (The University of Auckland)
-------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

### Sorption (3)

Chair: Seiichi Yamaguchi (Waseda University)

<b>ID</b>	<b>Paper and authors</b>
<b>1216</b>	The appliance of NH <sub>3</sub> /salt working pair on solar-driven sorption thermal energy storage with its thermodynamic analysis Xiao Liang, Sai Zhou, Guogeng He, Dehua Cai (Huazhong University of Science and Technology)
<b>1189</b>	Experimental performance analysis and simulation of an internally cooled liquid desiccant air conditioning system using a novel ionic liquid Richard Jayson Varela, Seiichi Yamaguchi, Niccolo Giannetti, Kiyoshi Saito (Waseda University), Xin-Ming Wang (Evonik Japan Co., Ltd.), Hiroshi Nakayama (Chubu Electric Power Co., Inc.)
<b>1194</b>	Effect of heat and mass transfer characteristics on the performance of the adsorption dehumidification system Indri Yaningsih, Koji Enoki (The University of Electro-Communications), Takahiko Miyazaki (Kyushu University)
<b>1201</b>	Experimental assessment of cooling power of water adsorption on nano-tailored microporous silica in a downscaled system Frantisek Miksik, Youssef Ahmed, Takahiko Miyazaki (Kyushu University)
<b>1300</b>	Adsorption desalination using natural mesoporous material impregnated with chloride substances Mitsuki Izawa, Fang He, Katsunori Nagano (Hokkaido University), Junya Togawa (Nihon Netsugen System Co., Ltd.)

### Cycle analysis (3)

Chair: Katsumi Hashimoto (Central Research Institute of Electric Power Industry)

<b>ID</b>	<b>Paper and authors</b>
<b>1151</b>	Experimental analysis of CO <sub>2</sub> blends for transcritical refrigeration systems Daniel Sanchez, Daniel Calleja Anta, Laura Nebot Andres, Ramon Cabello, Rodrigo Llopis (Jaume I University)
<b>1155</b>	Energy performance of a CO <sub>2</sub> transcritical refrigerating plant with a thermoelectric subcooler system Daniel Sanchez (Jaume I University), Patricia Aranguren, Alvaro Casi (Public University of Navarre), Ramón Cabello (Jaume I University), David Astrain, Miguel Araiz (Public University of Navarre), Rodrigo Llopis, Daniel Calleja-Anta, Laura Nebot-Andrés (Jaume I University)
<b>1056</b>	Integrated R744 unit for hotels: Analysis of field data Silje Smitt, Ignat Tolstorebrov, Armin Hafner (NTNU)
<b>1171</b>	Performance Evaluation of CO <sub>2</sub> HPWH System Kashif Nawaz, Bo Shen, Ahmed Elatar, Van D. Baxter, Omar Abdelaziz (Oak Ridge National Lab)
<b>1021</b>	Experimental Comparison of Cycle Modifications and Control Strategies for a Multi-Stage Two-Evaporator Transcritical CO <sub>2</sub> Refrigeration Cycle Riley B. Barta, Davide Ziviani, Eckhard A. Groll (Ray W. Herrick Laboratories)
<b>1104</b>	Theoretical analysis of the power and annual energy demands of a supermarket with a CO <sub>2</sub> booster refrigeration cycle Sotirios Thanasoulas, Jaime Arias, Samer Sawalha (KTH)

### Components and processes (4)

Chair: Armin Hafner (Norwegian University of Science and Technology)

<b>ID</b>	<b>Paper and authors</b>
<b>1001</b>	Preliminary experimental investigation on a transcritical R744 condensing unit using the novel PWM ejector Paride Gullo, Martin Ryhl Kaern (Technical University of Denmark (DTU)), Michael Birkelund, Ekaterini E. Kriezis (Danfoss A/S)
<b>1038</b>	Analysis of the R744 flow through the ejector ducts on the basis of visualisation procedure at the dedicated laboratory test rig Jakub Bodys, Michal Palacz, Michal Haida, Jacek Smolka, Andrzej J. Nowak (Silesian University of Technology)

1147	Two-fluid CFD model for R744 two-phase ejectors Knut Emil Ringstad, Armin Hafner (Norwegian University of Science and Technology)
1039	Non-equilibrium approach in simulations of the R744 flow through the motive nozzle of the two-phase ejector Jakub Bodys, Jacek Smolka, Michal Palacz, Michal Haida (Silesian University of Technology), Krzysztof Banasiak (SINTEF Energy Research)
1041	Advanced modelling of a transcritical CO <sub>2</sub> ejector Yu Fang, Srijit Sen, Sebastien Poncet (University of Sherbrooke), Yann Bartosiewicz (Catholic University of Louvain), Hakim Nesreddine (Hydro-Quebec), Dominique Monney (Emerson Commercial and Residential Solutions)

## Systems (4)

Chair: Ryo Akasaka (Kyushu Sangyo University)

ID	Paper and authors
1162	Field data of CO <sub>2</sub> integrated refrigeration, heating and cooling systems for supermarkets Giacomo Tosato, Silvia Minetto, Antonio Rossetti (Construction Technologies Institute- National Research Council), Armin Hafner (NTNU Department of Energy and Process Engineering), Christian Schlemminger (SINTEF Energy Research), Sergio Giroto (Enex Srl)
1117	Two-phase CO <sub>2</sub> loop for thermal energy management in buildings: Concept and building energy performance improvement. Parham Eslami Nejad, Arash Bastani (CanmetENERGY)
1200	Solar heat recovery system using CO <sub>2</sub> as working fluid Haruhiko Yamasaki (Osaka Prefecture University), Hiroyuki Wakimoto, Hiroshi Yamaguchi (Doshisha University), Peter Neksa (SINTEF)
1046	Study of a PV-T collector working as an evaporator in a CO <sub>2</sub> solar assisted heat pump Emanuele Zanetti, Marco Azzolin (University of Padova), Sergio Giroto (Enex Srl), Davide Del Col (University of Padova)
1118	Novel ground heat exchanger configurations for CO <sub>2</sub> direct expansion geothermal heat pumps Parham Eslami Nejad, Messaoud Badache, Arash Bastani, Alain Nguyen (CanmetENERGY)

## Applications (1)

Chair: Xianting Li (Tsinghua University)

ID	Paper and authors
1013	Ammonia Chiller Performance Enhancement by Implementation of Ejector Overfeed Cycle with Braze Plate Evaporator Neal Lawrence (Creative Thermal Solutions, Inc.), Stefan Elbel (Creative Thermal Solutions, Inc. and University of Illinois), Joe Zheng, Mario Wenzel (Creative Thermal Solutions, Inc.), Pega Hrnjak (Creative Thermal Solutions, Inc. and University of Illinois)
1089	Performance evaluation of a multi-evaporator NH <sub>3</sub> -CO <sub>2</sub> cascade refrigeration system with IHX for seafood processing industry Santosh Kumar Saini, Mani Sankar Dasgupta (BITS Pilani), Kristina N. Widell (SINTEF Ocean), Souvik Bhattacharyya (BITS Pilani)
1076	Experimental investigation on thermal energy transportation by CO <sub>2</sub> hydrate Joonho Park, Jungjoon Park, Sung Choi (Department of mechanical engineering, Korea university), Yong Tae Kang (School of Mechanical Engineering, Korea University)
1052	Study of a heat pump for simultaneous cooling and desalination using carbon dioxide Paul Byrne, Ahmadou Tidiane Diaby, Thierry Mare (University of Rennes)
1061	A comparison between superheat control and semi - flooded control in a CO <sub>2</sub> refrigeration cycle Judith Vander Heyde, Alihan Kaya (Ghent University), Michael Elstrom, Koudal Fisker Martin (HB Products), Michel De Paepe, Steven Lecompte (Ghent University)
1181	A Natural Refrigerant DME and HC Eco- Efficient Mixture Alternative Gratiela Maria Tarlea, Mioara Vinceriu (Technical University of Civil Engineering), Ana Tarlea (Romanian General Association of Refrigeration)

## December 9, 2020

### Components and processes (5)

Chair: Norihiro Inoue (Tokyo University of Marine Science and Technology)

ID	Paper and authors
1133	Development of CO <sub>2</sub> refrigeration technology between 1995 and 2020 Armin Hafner (NTNU)
1060	Analysis and comparison between different energy consumption performances of a CO <sub>2</sub> trans-critical booster system with Modulating Ejectors and parallel compression in various configurations and different climate conditions Chiara Corazzol, Willy Muvegi, Luca Mattiello, Luigi Nalini (Carel)
1186	Assessment of energy efficiency and operating performance of refrigerating systems in a supermarket Stefan Hudjetz (Biberach University of Applied Sciences), Peter Koehler (KKE-Plan), Martin Becker (Biberach University of Applied Sciences)
1009	Experimental Results of various efficiency enhancing measures for CO <sub>2</sub> refrigeration systems Christian Doerffel, Christiane Thomas, Ullrich Hesse (TU Dresden)
1079	Performance Comparison of Three Refrigerants in A Novel Unitary Air Conditioning System Hanlong Wan, Tao Cao, Yunho Hwang (University of Maryland), Se-Dong Chang (LG Electronics)

### Systems (5)

Chair: Yohei Kayukawa (National Institute of Advanced Industrial Science and Technology)

ID	Paper and authors
1020	Feasibility Study on R290 Thermal Management Systems for BEVs Hideto Noyama (Mitsubishi Heavy Industries Thermal Systems, Ltd.), Takayuki Kobayashi, Hirotaka Tanabe (Mitsubishi Heavy Industries, Ltd.)
1102	Research on reliability of R290 heat pump under low temperature heating condition YanJun Du, Jianhua Wu, Che Wang (Xi'an Jiaotong University)
1055	Experimental analysis of a R600 high-temperature heat pump in sub-critical and trans-critical operation Manuel Verdnik, Rene Rieberer (Institute of Thermal Engineering, Graz University of Technology)
1097	Experimental performance analysis of an air condensed ammonia chiller with critical charge Jose Antonio Exposito Carrillo, Francisco Jose Sanchez De La Flor (Universidad de Cadiz), Jose Manuel Salmeron Lissen (Universidad de Sevilla)
1022	The Joule cycle realised in a Rotation Heat Pump Andreas Laengauer (ecop Technologies GmbH, R&D), Bernhard Adler (ecop Technologies GmbH, CEO)

### Applications (2)

Chair: Richard Jayson Varela (Waseda University)

ID	Paper and authors
1014	Worldwide performance of CO <sub>2</sub> booster systems with auxiliary compressor Rodrigo Llopis, Jesus Catalan-Gil, Daniel Sanchez, Laura Nebot-Andres, Daniel Calleja-Anta, Ramon Cabello (Jaume I University)
1048	Yearly performance of all-in one CO <sub>2</sub> booster systems for refrigeration, heating and air-conditioning Marco Azzolin, Gianluca Cattellan (University of Padova), Simone Dugaria (Free University of Bolzano-Bozen), Corrado De Gioia Carabellese (Frascold Spa), Davide Del Col (University of Padova)
1103	Field measurement analysis of integrated refrigeration system in a new supermarket Sotirios Thanasoulas (KTH), Claudia Perea Diaz (Universidad Politecnica de Madrid), Samer Sawalha (KTH)
1080	Machine learning methods for prediction of hot water demands in integrated R744 system for hotels Zhanluo Zhang (Norwegian University of Science and Technology/Shanghai Jiao Tong University), Silje Marie Smitt, Trygve Magne Eikevik, Armin Hafner (Norwegian University of Science and Technology)
1099	Comparative analysis of the domestic hot water production with R290 and R744 heat pumps Ximo Masip, Estefania Hervas-Blasco, Emilio Navarro-Peris, Jose Miguel Corberan (Universitat Politècnica de València)

## Technology implementation

Chair: Akio Miyara (Saga University)

ID	Paper and authors
1116	Integrated thermal storage and heat recovery of the CO <sub>2</sub> refrigeration system for fishing vessels Muhammad Zahid Saeed (Norwegian University of science and Technology), Kristina Norne Widell (SINTEF Ocean), Armin Hafner (Norwegian University of science and Technology), Tom Stale Nordtvedt, Eirik Starheim Svendsen (SINTEF Ocean)
1146	Active latent heat storage using biowax in a central heating system of a ZEB living lab Alexis Sevault (SINTEF Energy Research), Erling Naess (NTNU)
1149	Evaporative cooling system with natural refrigerant at -50 C and 100 m underground Pierre Barroca, Armin Hafner, Angel Alvarez Pardinias (Norwegian University of Science and Technology), Bart Verlaat, Lukasz Zwalinski, Wojciech Hulek, Paolo Petagna, Pierre Hanf, Michele Battistin (CERN)
1138	Large SEPR and COP improvement obtained by controlling an ultra-low-charge DX chiller using a vapor quality sensor. Henrik Kudsk (HB-products), Oliver Kacic, Jens Denecke (Karlsruhe, universitet), Michael Trauer (Christof Fischer GmbH), Michael Elstroem (HB-products)
1123	Attaining a higher flexibility degree in CO <sub>2</sub> compressor racks Angel A Pardinias (Norwegian University of Science and Technology NTNU), Luca Contiero (Universita Degli Studi di Padova), Armin Hafner (Norwegian University of Science and Technology NTNU), Krzysztof Banasiak (SINTEF Energi AS), Lars F.S. Larsen (Danfoss AS)
1191	Experimental Evaluation of a charge reduced Heat Pump Module using 150g of Propane Clemens Dankwerth, Timo Methler, Thore Oltersdorf, Peter Schossig, Lena Schnabel (Fraunhofer ISE)

## Regulation

Chair: Noboru Kagawa (National Defense Academy of Japan)

ID	Paper and authors
1211	IGNITION SOURCES AT THE STAGE OF USAGE FOR MINI-SPLIT AIR-CONDITIONER USING A3 REFRIGERANT: 2nd report Kazumi Tamura, Kenji Takaichi, Shigeharu Taira, Atsushi Baba, Shyunji Itakura, Hironori Mori, Hiroaki Makino (The Japan Refrigeration and Air Conditioning Industry Association (JRAIA))
1069	IGNITION SOURCES AT THE STAGE OF USAGE FOR MINI-SPLIT AIR-CONDITIONER USING A3 REFRIGERANT: 1st report Kazumi Tamura, Kenji Takaichi, Shigeharu Taira, Atsushi Baba, Shyunji Itakura, Hironori Mori, Hiroaki Makino (The Japan Refrigeration and Air Conditioning Industry Association (JRAIA))
1202	Numerical Simulation of Strongly Flammable Refrigerant Leakage from a Split Air Conditioner Naoya Ashihara, Makoto Ito, Chaobin Dang, Eiji Hihara, Yu Chen (the University of Tokyo)
1206	Effect of lubricating oil additives on compressor explosion accident in pump-down operation of an air conditioner Shizuo Saitoh, Tomohiro Higashi, Chaobin Dang, Eiji Hihara (The University of Tokyo), Yu Chen (Department of Human and Engineered Environmental Studies Graduate School of Frontier Sciences, The University of Tokyo), Yuji Shitara (ENEOS Corporation)
1128	Comparison of correlations for modelling heat exchanger performance in a compact ammonia refrigeration unit Valentin Salgado Fuentes, Rossana Boccia, Wiebke Brix Markussen, Erasmus Damgaard Rothuizen (Technical University of Denmark), Johannes Kristofersson, Claus Madsen (Danish Technological Institute), Brian Elmegaard (Technical University of Denmark)

## Applications (3)

Chairs: Shigeharu Taira (DAIKIN INDUSTRIES, Ltd.) Michio Moriwaki (DAIKIN INDUSTRIES, Ltd.)

ID	Paper and authors
1112	Design and simulation of a small cold storage with NH <sub>3</sub> refrigeration system and an indirect cooling loop with CO <sub>2</sub> Tom Andre Bredesen, Ignat Tolstorebrov (NTNU), Kristina N. Widell (SINTEF Ocean AS), Maddali Ramgopal (Indian Institute of Technology Kharagpur), Trygve M. Eikevik (NTNU)

<b>1012</b>	Advanced R744 Technology Applied to a Multi-temperature Refrigerated Container Neal Lawrence (Creative Thermal Solutions, Inc.), Stefan Elbel, Pega Hrnjak (Creative Thermal Solutions, Inc. and University of Illinois)
<b>1153</b>	Numerical investigation of a CO2 cooling unit for refrigerating transport operating switching between different configurations Francesco Fabris (Universita' degli Studi di Padova), Paolo Artuso, Silvia Minetto, Sergio Marinetti, Antonio Rossetti (National Research Council, Construction Technology Institute)
