

TRANSACTIONS OF THE JAPAN SOCIETY OF REFRIGERATING AND AIR CONDITIONING ENGINEERS

Transactions of the Japan Society of Refrigerating and Air Conditioning Engineers is a quarterly publication, aimed at the extensive business development of science and technology of interest, including cryogenics, refrigeration, air-conditioning, heat pumps, foods, and medical applications. This periodical aspires to enlighten and be effective on mutual exchange of information of research and development outcomes among not only members but also researchers and engineers in related fields. The Japan Society of Refrigerating and Air Conditioning Engineers (JSRAE) annually awards authors of outstanding papers published in the *Trans. JSRAE*.

Instructions for Contributors

(Revised March 27, 2014)

Transactions publishes original research in the fields of Refrigerating and Air Conditioning, ranging from fundamental principles to practical applications. The review process of submitted manuscripts will be overseen by one of the editorial board members. Prospective authors should follow the instructions for manuscript submission. If you have any questions regarding the submission process, you may contact the editorial office.

TYPES OF CONTRIBUTIONS

- 1) Original Research Papers: Significant and complete research works having the following:
 - a) Originality; to be rich in novelty or originality in subject, content, or method of research.
 - b) Usefulness; to be worthwhile academically or technically (assessed from authors declaration).
 - c) Expansibility; to be promising for future academic system or engineering applications.
 - d) Reliability; to be free from apparent (serious) errors in content.
 - e) Completion; to be complete to a high degree.

Original research papers will be classified as “Regular papers” or as “Open Access papers,” as these follow differing reviewing and publication processes.

Regular papers: Twelve printed pages maximum.

At least one of the authors must be a member of JSRAE. After regular review (a several-step revision process), the accepted paper is published in JSRAE Transaction, which is issued 4 times per year.

Open access papers: Six printed pages maximum.

JSRAE membership of the author is not required. After rapid review (generally, a one-step revision process), the accepted paper will be released to the public (open access) on the Web as soon as possible. The publication of the paper is also recorded in JSRAE Transaction, which is issued for 4 times per year.

- 2) Translated papers: Papers presented in English or Japanese translation contributed in this transaction by the same authors. Changes in contents or authors are not allowed. The original publication must be clearly indicated under the title of the paper.

- 3) Journal Reviews: Critical reviews or keynote papers in important areas of Refrigerating and Air Conditioning. As a rule, review article are submitted at the request of members of the editorial board. Prospective authors are asked to consult with one of the Editors to ensure the suitability of their topics.

MANUSCRIPT PREPARATION AND SUBMISSION

Manuscripts must be written in Japanese or English. Authors are recommended to refer to “Preparing and Submitting Manuscripts” for more details.

The research paper should be author’s original work, which has not been previously presented. This does not include papers presented in conferences hosted or co-hosted by JSRAE (presented in the proceedings of JARAE), or papers presented in the publications of other organizations (such as university or research laboratory bulletins). However, in this case, authors must clearly declare the previous publication and attach a copy. If submitting papers presented in the above-mentioned conferences or publications without changing their content, the original name of the conference or publication should be indicated in the designated column (left column located under the first page of text), according to the template.

Manuscripts must be written in English and typed in two columns, with 58 lines per column on numbered pages of A4 or US letter size. Margins are to be 30 mm from the top, 27 mm from the bottom, 24 mm from the right and left, and the gap between columns is to be 12 mm. All figures and tables should be included in the most appropriate locations within the main text and not placed on separate pages. A slight difference in the number of lines is permitted. Authors are recommended to use the template or to refer to recent issues for style guidance. A template (Microsoft Word) and online journal volumes are available:

http://www.jsrae.or.jp/touko/e_template2014_R.docx

https://www.jstage.jst.go.jp/browse/tjsrae/advpub/0/_contents

Preparation of Manuscripts

- 1) Title and authors: This should contain the following items in the given order:
 - (a) Title
 - (b) Author's names (given name, middle initial and surname), affiliations and addresses. If authors' affiliations differ, these should be identified by the use of superscripts *, **, etc. Identify the corresponding author by indicating "†" and give their fax number and e-mail address.
- 2) Summary: A concise and factual abstract is required. The abstract should briefly state the purpose of the research, the principal results, and the major conclusions. An abstract is often presented separately from the article, so it must be able to stand alone. For this reason, references should be avoided. Also, non-standard or uncommon abbreviations should be avoided; however, if essential, abbreviations must be defined upon their first mention within the abstract itself. The abstract must not exceed 200 words. The use of Times New Roman 9 pt font with 10 pt spacing between the lines is recommended. Before typing, an indent of two characters spaces should be introduced.

For keywords, select 5 to 8 English words that express the main theme and make it easy to determine the content of the research paper. Select two keywords from the vocabulary table provided from JSRAE and list them as the first keywords. Capitalize the first letter of the keyword. The font size must be 10 pt. Take one blank line from Summary for the correct spacing.
- 3) Main Text: Main headings will be Introduction, Nomenclature, Theory, Experimental, Results, Discussion, Conclusions, and References. Leave a blank line above and below each main heading. Main heading are to be typed in 11 pt font and centered.
- 4) Section heading; Left-aligned, typed in 10 pt font, leave a blank line above the heading.
- 5) Term heading; Left-aligned, typed in 10 pt font, do not leave any blank lines above or below this level heading.
- 6) Small headline: Typed in 10 pt font, the text begins on the same line as the headline, after two character blanks.
 - (a) Equations: Mathematical equations should be numbered serially, such as (1), (2), (3). Cite as Eq. (1), Eqs. (3)–(5). Spell out "Equation" if it appears at the beginning of a sentence.
 - (b) Figures and Tables: Each figure and table must have a caption. Numbers should be given as Fig.1, Fig.2, Table 1 (photos are included in figures). Cite as Fig.1, Figs. 1–3, or Table 1. If it appears at the beginning of a sentence, it should be indicated as Figure 1 or Figures 1–3, without abbreviation.
 - (c) For titles of tables and figures, use 10 pt Times New Roman and capitalize only the initial word. In addition, titles of tables and figures should be written after the number of table (figure), keeping one character blank. Figures, tables, and photos should be clear enough to be printed and the characters in the figures and tables are to be in a font larger than 9 pt. For titles of abscissa and longitudinal axes of charts, use a 10 pt font. Photos should be of sufficient sharpness for high-quality printing. Leave a blank line above and below each figure or table.
 - (d) Literature: Cite in the text by use of superscripts (¹, ¹⁻³, etc.).
 - (e) Units: The use of SI units is recommended. For example; k [W/(m K)] or k [Wm⁻¹K⁻¹], $k = 0.58$ W/(m K) or $k = 0.58$ Wm⁻¹K⁻¹.
 - (f) Chemical Nomenclature: Use IUPAC or Chemical Abstract conventions. As for abbreviations of chemical compounds, follow internationally common usage. If necessary, make a note in the main body or footnote. For the names of enzymes, follow the rules of the International Union of Biochemistry. For refrigerant numbers, insert a half space (or a one-quarter space) between R and the symbol, e.g., R 134a.
- 7) Nomenclature: List symbols in alphabetical order with their definition and SI units. Greek letters, subscripts, and superscripts should follow Roman symbols.

- 8) References: Arrange references in order of their appearance in the main text of the manuscript. Refer to the following instruction and examples. References should appear in 9 pt font.
- (a) Journals; Name of author(s), Paper title, Name of journal, Year of publication, Volume (number), Pages (first and last page). Write Journal name in Italics and Volume in Bold face.
 - (b) Books; Name of author(s), Title of Book, Volume (not necessary if it is complete in one volume), revision(editor), Year of publication, Publisher, Place of publication, quoted pages (first and last page).
 - (c) Proceedings; Name of author(s), Name of proceedings, Place and Year of the conference, Volume, Pages (first and last page).
 - (d) Engineering data (brochure) ; Name of engineering data: Company name of publication, (Publication year, month)
 - (e) Patent; Name of inventor, Name of invention, the year of invention, patent number, application and/or registration.
 - (f) Web site; URL of web site: (year and month of quotation)

An important note for authors citing articles written in Japanese. When referring to such references, add “(in Japanese)” at the end of each description. If the cited work has an official English translation, authors are requested to reference that translation. However, if the cited work does not have an official translation, authors are requested to translate the citation information into English and provide both English and Romanized Japanese. (See the following example 3)

Manuscripts should be submitted by internet mail (email) or post, together with their cover sheets. The cover sheet format can be downloaded from the Society website. After submission, JARAE will send a receipt to the author no later than one week after receiving author’s manuscript. If authors do not receive a receipt from JARAE, please be sure to inquire. In addition, if the manuscript is to be submitted after obtaining the permission of contribution, authors accept responsibility for proofreading.

- 1) Via internet mail (email): Authors must submit their manuscript and cover sheet in PDF format. If supplemental documents, such as conference papers, cannot be converted into PDF format, it will be possible to send them by post.
- 2) By post: Authors must submit three copies of their manuscript (two copies are permissible for reprints) to the editorial office.

COPYRIGHT

The copyright of research papers, translated papers, and research reviews published in the transactions belongs to the society (JARAE). Authors must submit a “certificate of copyright transfer” to the society when contributing. If a contribution is not accepted, the certificate of transfer for the copyright will have no effect and the copyright for the contribution will be returned to the authors.

PUBLICATION CHARGES

Authors are required to pay publication charges at the rates shown below. For Society members, reduced rates apply.

LIST of PUBLICATION CHARGES (in Japanese Yen)

No. of Pages	Research Papers (Regular papers) Translated papers [Member]	Research Papers (open access papers) [Member]	Research Papers (open access papers) [Non-member]
1	3,086	5,000	8,000
2	6,172	10,000	16,000
3	9,258	15,000	24,000
4	12,344	20,000	32,000
5	15,430	25,000	40,000
6	18,516	30,000	48,000
7	21,602	For each surplus page: ¥10,000 (Member) and ¥16,000 (Non-member). Note, surplus page allowance is subject to editorial board approval. For papers written in Japanese, the last page, containing only the English title, authors' name and affiliation, summary, and keywords, is excluded from the page charges.	
8	24,688		
9	27,774		
10	30,860		
11	33,946		
12	37,032		

For research papers, authors will be charged ¥3,086 per page for Transaction publication, and the surplus charge of ¥6,172 per page for translated papers will be reduced to ¥3,086 per page. For open access papers, a rate of ¥5,000/page will apply if one of the authors is a JSRAE member, otherwise a rate of ¥8,000 yen/page applies, with a surplus per-page charge of ¥10,000 or ¥16,000, respectively. Note that surplus page allowance is subject to editorial board approval. For papers written in Japanese, the last page, composed only of the English title, authors' name and affiliation, summary, and keywords, will be excluded from the page charges. Publication in color requires editorial board approval and is subject to an additional color printing surcharge; however, online Web publication is not subject to the additional charge for color printing.
